

We are one of the largest fleet owners and operators in North America. As such, we understand first-hand what happens in the real world when our Pro-Spotters leave the production line. And just like you, our experience has been gained through the real world needs of the work place. The design and manufacturing of the TICO Pro-Spotter reflect this.

DRIVER PRODUCTIVITY — it's what makes the driver more efficient, more comfortable and therefore, more productive. We achieve higher Driver Productivity by incorporating TICO Ergonomics, the study of those factors or qualities related to design. It is this study of the driver interaction with equipment in the workplace that contributes to those attributes that truly sets TICO apart from the others.

DRIVER PRODUCTIVITY

Our TICO team stands behind every Pro-Spotter we build and each one is designed to help your business grow. We do this by designing and building TICO Pro-Spotters that can handle your Real World needs and provide maximum asset utilization.

Our trucks are "Purpose Built" and therefore maintain their Value through positive performance. We know what happens in the terminals, ports and on the roads, so we design and build these trucks to minimize those factors on your TICO, and to generate "low lifecycle costs" accordingly. After years of service, your TICO will maintain a higher resale Value.

TICO

Real World Business Benefits

TICO is mission driven to be the most respected provider of equipment and services in the port, terminal, distribution, logistics, and intermodal space. As a service provider, TICO partners with leading ports, terminal operators and transportation enterprises adding value in their business that is not available from others.

As a manufacturer of terminal tractors and trailers, TICO leverages our unique fleet operating and maintenance knowledge to be the one true innovator for the real world. Pursuit of this mission requires steadfast commitment to TICO values.

TICO Values

PRIORITIES:

TICO commits everything to long-term relationships that make a positive impact on our customers.

INTEGRITY:

TICO will be a great place to work and a great company with which to do business. Every TICO team member is personally accountable. Integrity in all our dealings is essential to our long-term vision.

QUALITY:

TICO delivers the best services. TICO sells the best products. TICO customers receive the best support.

FOR THE REAL WORLD

Just Like You, We Use Pro-Spotters EVERY DAY!

MAXIMUM UP-TIME

At TICO, we know your business runs 24/7 in the real world and that maximum up-time is one of the most important benefits of any tool. As the saying goes in business "Time is Money"... so our trucks are built to remain on the job for you. Our Pro-Spotters have dozens of Standard Features to keep the trucks and the products they haul moving. And we do it more cost-effectively, as our standard features are either add-on cost options or not available from our competitors.

Fast, Simple Maintenance is imperative with any equipment tool. Our extensive expertise in truck maintenance, where each minute the truck sits waiting for service is a major cost, has driven us to build our Pro-Spotters accordingly.

TICO Terminal Tractors are purpose built on modular platforms to make sure most systems/ parts can be removed and replaced in minutes, not hours or days. We have specifically designed our terminal tractors to be maintained and repaired by real world maintenance teams, not rocket scientists (or should we say, engineers).

FAST, SIMPLE MAINTENANCE

TICO PRO-SPOTTER COMPETITIVE COMPARISONS

Pro-Spotters provide Maximum Up-time, Fast, Simple Maintenance, Driver Productivity and Value, so here's how we compare to our competitors. Many of TICO's standard features are not even offered from these other manufacturers or are offered as an option. See for yourself:

TICO Pro-Spotter STANDARD Equipment	TICO Pro-Spotter	Kalmar T2	Capacity Sabre	Autocar XSpotter
Large reinforced composite cab is strong, and corrosion proof for increased long term value.	✓	▽	▽	▽
TICO Pro-Spotter utilizes 100% U.S. content and has the strongest, most durable frame in the industry with continuous welds that minimize flexing and increases the life of the truck.	✓	▽	▽	▽
Automatic rear door , which is 27 inches wide by 66¼ inches tall, and provides fast and easy entry and egress via a bi-fold door activated by a dash switch. This feature increases productivity with numerous door operations per hour in your real world business.	✓	▽	▽	▽
Strongest boom in the industry with continuous welds and 1½ inch side rails for increased life and strength.	✓	▽	▽	▽
Power up and down driver side window allows for fast and easy operation.	✓	▽	▽	▽
The Bumper is mounted 7 inches in front of the face of the cab for more protection from frontal impacts.	✓	▽	▽	▽
External radiator surge tank can be viewed and serviced without raising the cab. All fluid checks are done from ground level without raising the cab.	✓	▽	▽	▽
TICO's curb side fender is a bolt on design to absorb impact, while protecting the cab and can be replaced with 4 bolts in case of severe impacts.	✓	▽	▽	▽
Large 65 gallon step diesel fuel tank is standard requiring fewer fuel deliveries and costs, while at the same time maximizing up-time. The patented fuel tank steps are very deep, providing easier entry and egress.	✓	▽	▽	▽
Shut-off valves on the hydraulic tank eliminates having to drain the tank before performing repairs. These shut-off valves are located on the inlet and outlet ports on the inward side of the tank for protection.	✓	▽	▽	▽
All metal dash that is strong and durable. The controls used the most by the operator are within easy reach for all driver profiles.	✓	▽	▽	▽
20 Gallons per Minute (GPM) engine mounted hydraulic pump allows for faster lifts and longer life.	✓	▽	▽	▽
Air filter and filter minder can be accessed easily from ground level without raising the cab.	✓	▽	▽	▽
Toe guard under the step reduces the risk of a driver tripping.	✓	▽	▽	▽
Heater and air-conditioning components are easily serviced from the front of the cab via an access panel.	✓	▽	▽	▽
Cab power distribution centers (PDC) are located inside the cab and accessible through front access panels.	✓	▽	▽	▽
Cab pivot bushings can be serviced with the removal of cab parts from the front with the cab down. They are designed to absorb energy in case of frontal impact to reduce damage to the cab.	✓	▽	▽	▽
External trailer air manifold and electrical connections are on the cab protection bar for easy access and servicing.	✓	▽	▽	▽
Large Diameter Grab Handles for secure entry and exit into/from the cab.	✓	▽	▽	▽

TICO Pro-Spotter STANDARD Equipment (continued)	TICO Pro-Spotter	Kalmar T2	Capacity Sabre	Autocar XSpotter
Joy-stick electronic boom controller is much more durable than mechanical boom controls, thereby reducing maintenance time and cost.	✓	▽	▽	✓
4-Point dual air bag suspension and cab stabilizer with easy-to-maintain cab pivot bushings, keeps the cab from twisting for longer life.	✓	▽	⊙	✓
Wiper motor and assemblies are located overhead and accessible from inside the cab via a removable access panel for much faster servicing.	✓	▽	✓	✓
Fifth wheel release with trailer interface does not allow the disengagement of the fifth wheel jaw locks while the trailer is moving. Disengagement can only occur while the trailer brakes are set.	✓	⊙	▽	▽
Hour meter is mounted on the side of the cab (protected by the standard cab steel rub rails) making checking engine hours much faster.	✓	⊙	▽	▽
Cab side rub protection made from steel is standard minimizing any damage to the cab when operating in those really tight situations.	✓	⊙	⊙	▽
TICO Pro-Spotter offers a tilt steering column providing every size driver improved comfort.	✓	⊙	⊙	⊙
Noise, Heat and Dust abatement system minimizes the amount of dust and heat from entering the cab.	✓	⊙	⊙	⊙
Front suspension springs are rated at 14,500 lbs. for increased durability.	✓	⊙	✓	✓
LED lighting reduces maintenance due to extended life of LED in a harsh environment.	✓	⊙	✓	✓
5-inch lift cylinders with a 20 GPM engine mounted pump eliminate the need for a PTO and provide the power you need and lifting speed for any weight load.	✓	⊙	✓	✓
Twenty degree pick up ramps with 4 inch wide skid ramps result in smoother trailer pickup and reduced shock loads.	✓	✓	▽	▽
Pro-Spotter Cabs have an ignition and several auxiliary electrical hookups to easily supply power for electronic devices. The right portion of the dash is designed to hold a computer.	✓	✓	⊙	✓
TICO Pro-Spotter OPTIONAL Equipment	TICO Pro-Spotter	Kalmar T2	Capacity Sabre	Autocar XSpotter
Optional Galvanized Package for the ultimate in corrosion protection and, when combined with a composite cab, provides the best corrosion protection in the industry.	⊙	▽	▽	▽
Optional LED headlights for reduced maintenance and longer life.	⊙	⊙	⊙	⊙
Optional front and rear cameras provide unsurpassed visibility.	⊙	▽	▽	▽
