# TOYOTA HIGH-CAPACITY CORE IC PNEUMATIC ADVANTAGES

---

▶ **MD4 7" TOUCH SCREEN DISPLAY**

provides key forklift information and advanced diagnostics.

---

▶ **LOW-MOUNTED TILT CYLINDERS,** shorter carriage, and open-view front glass for optimal visibility.

---

▶ **ENGINE PROTECTION SYSTEM** and high-capacity cooling system provide durability assurance.

---

▶ **SUPERIOR TORQUE AND HORSEPOWER**

from Cummins 4-cylinder diesel engine

---

▶ **WET-DISC BRAKES** provide consistent performance and are virtually maintenance free.

---

▶ **SIDE-TILT CAB** opens 65° for easy access and enhanced serviceability.

---

▶ **DANA TE-10 TRANSMISSION** with electronic control provides smooth, reliable performance.

---

▶ **FINGERTIP CONTROLS** provide easy adjustment of hydraulic functions.

---

▶ **PREMIUM CABIN** comes standard with heat, A/C, and fingertip controls.

---

▶ **HEAVY DUTY DRIVE AXLE** offers maximum durability in high-capacity and outdoor applications.

---

▶ **ADVANCED HYDRAULIC SYSTEM** with built-in pressure monitoring through digital display

---

# THE MUSCLE TO LIFT – NO MATTER THE LOAD

## TOYOTA HIGH-CAPACITY CORE IC PNEUMATIC

Welcome to the big show. Toyota's High-Capacity Core IC Pneumatic delivers versatility to handle any heavy-duty task while promising to fit the exact needs of your high-capacity operation. Ideal for lumber, steel, automotive, and any application where you need major lifting capacity, the High-Capacity Core IC Pneumatic comes equipped with a Cummins 4-cylinder diesel engine that delivers up to 173 HP to give you the torque you need to move anything in the warehouse or under the sun. And it's durable, with a rugged drive axle and electronically controlled transmission rounding out a reliable, heavy duty build.

## VISIBLY THE BEST

See the value of the High-Capacity Core IC Pneumatic in two important areas. When operators are hard at work, the low-tilt cylinder design, shorter carriage, and clear-view glass provides an unobstructed sightline. And when it comes time for routine maintenance, a full side-tilt cab with 65° opening improves access to major components – making the High-Capacity Core IC Pneumatic the clear, best option.

## A CAB FOR ALL NEEDS

Keeping operators comfortable with a premium ergonomic cab design is key to productivity. The standard premium cab provides amenities such as work lights, heaters, and air conditioning (value and no-cab options available).

## ADVANCED TECHNOLOGY, INFO WITHIN REACH

Information is the key to productivity. To help you stay ahead of the curve, the High-Capacity Core IC Pneumatic comes equipped with a state-of-the-art MD4 display that delivers real-time diagnostic information including a live fuse box and pressure readings directly from the hydraulic circuits. The display also provides functions for user access control. The optional pre-operation checklists and pin code entry system can help limit access to the 2THD to pre-approved, properly trained operators.

## AN INVESTMENT THAT PAYS YOU BACK

Adding a new forklift to your fleet should be an investment that lasts. Toyota builds the best for its customers. It's a forklift with better components and meticulously planned integrated systems that work together to deliver intuitive, dependable performance day after day. Toyota forklifts don't often require service beyond scheduled maintenance. But when they do, it's fast and easy — by design. And legendary Toyota quality means more productivity over the lifecycle of your forklift, along with lower repair costs.
